Patrick,

Thanks for the update. It does indeed sound like our programs have been working closely together. The last I heard was that our team sent over some additional comments including letting ATSDR know about some full study reports and other data sets that ATSDR was not aware of. I'm optimistic that all this information will be incorporated into a robust draft document. If you have not seen the most recent comments I would be happy to send you a courtesy copy.

I would be most appreciative if you would continue to keep us posted on your timing, as well as substantive changes and differences, as we will need to be ready for any press.

Regards,
Nancy

Once we have received the peer reviewer comments back, we will address their comments, make any required revisions, and submit the profile for agency clearance. Following agency clearance the profile will be released for the 90-day public comment period.

I am happy to keep you posted on our activities and timeline in the coming weeks.

Best,
Patrick Breyse

Pat,

Many thanks for the note. Its good to hear that our collaborations are continuing. Our visit to Atlanta will be Sept 12-13 and we just learned you will be out of town that time. It seems that possible Charlotte and Rick will be able to meet with some of your colleagues.

Do you make it up to DC regularly? Perhaps we could catch up during one of those visits. Please keep us posted.

Hi Pat,

I hope summer is treating you well.

We noticed the FR notice that ATSDR released in May regarding "draft interaction profile for mixtures of insecticides: pyrethroids, organophosphates and carbamates".

As we've discussed, EPA is very interested in ensuring collaboration with other Federal Agencies, particularly when there are impacts for our regulatory programs. Our pesticides program reviewed the draft interaction profile and the attached comments were sent to Dr. Pohl. I believe this was done informally, and not through the docket.

I hope our teams of experts will continue to work together collaboratively as ATSDR works to address all the comments that are received. Additionally, we may be down in Atlanta in September for a meeting with our regional leaders. Perhaps that would be a good opportunity to connect and talk about future projects where early collaboration may be helpful, particularly as it relates to our chemicals and pesticide regulatory programs and activities.

Nancy

Hi Pat,

I hope you are doing well. Our programs are continuing to work together, hopefully in a very positive away. Attached are some comments that were recently sent to ATSDR on the draft methyl bromide assessment. I believe the comments reiterate some of the concerns we had in 2017. Please let me know if you have any questions for us.
